Energy Bill Relief Scheme for businesses

A new Government scheme has been announced which will see energy (gas and electric) prices cut for businesses, charities and public sector organisations – protecting them from rising energy costs.

New support has been unveiled by Business Secretary Jacob Rees-Mogg designed to support growth, helping prevent unnecessary insolvencies and protecting jobs.

Through a new Government Energy Bill Relief Scheme, the Government will provide a discount on gas and electricity prices for all non-domestic customers whose current prices have been significantly increased as a result of global energy costs. This support will be equivalent to the Energy Price Guarantee put in place for households.

Further details can be found on our website www.sidcuppartners.co.uk under news.
